HOME PAGE · HERO AND ABOUT

Trusted professional transformation.

Enabling businesses to transform, grow and lead.

VeriPro Tech partners with small and mid-sized businesses to simplify operations, leverage technology and build strong foundations for sustainable growth.

Calls to action on this page

- **Book a free discovery call** → opens the booking page (see Booking guide).
- **See pricing** → jumps to Pricing.

About VeriPro Tech

VeriPro Technologies Inc. is a US-registered technology company serving clients globally. We help you build a stronger business, use technology well and deliver the results that matter, through advisory, automation, digital operations and software we build and run ourselves.

Our values

Trusted

We build trust through transparency and reliability.

Professional

We bring expertise, discipline and integrity.

Innovative

We leverage technology and insight to drive transformation.

Results driven

We deliver measurable impact and sustainable value.

Vera example on the home page

The home page shows an illustrative conversation: a customer asks for a Thursday appointment, Vera offers 2:30 with Jordan at $65 with no deposit, the customer replies YES, and the booking is confirmed. The panel is labelled "Example."

VERIPRO SOFTWARE

Software built for small teams

Each product works on its own. Add the next one when you are ready.

EARLY ACCESS

VeriBook

Online booking, deposits and reminders, with Vera answering missed calls and texts and booking them.

Plans: Standard · Larger requirements (quote)

PLANNED

VeriBill

Client records, quotes, invoices and payment history in one place.

Action: join the list by emailing info@veriprotech.com.

PLANNED

VeriHR

Staff records, rosters, time off, certifications and onboarding checklists.

Action: join the list by emailing info@veriprotech.com.

IN VERIBOOK

Vera

Our AI assistant. She books, answers and follows up, and never changes anything without a confirmed yes.

Read: Vera guide

How VeriPro software behaves

- Every change Vera makes, such as a booking, reschedule or cancellation, needs the customer's explicit confirmation first.
- Every action is recorded, so the business owner can review it.
- A human can take over any conversation at any time.

PRICING

Simple pricing. No surprises.

US dollars. Standard is the same for everyone. Larger requirements are priced to fit.

STANDARD

Standard plan

$10 / month

or $100 / year (annual saves $20, about $8.33 a month)

- Access to VeriPro AI SaaS products
- Standard AI usage allowance (to be confirmed)
- Email support (to be confirmed)

Action: Get started by email

BESPOKE

Larger requirements

Custom pricing

Priced to your requirements.

- More staff, locations or AI usage
- Integrations and custom setup
- Dedicated onboarding and support
- Written quote before you commit

Action: Request a quote by email

Advisory and delivery

Engagement	Price	Action
Discovery call (30 minutes)	Free	Book a call
Launch & Automate	Custom quote	Request a proposal
Build & Scale	Project or retainer	Talk to an expert

All payments are non-refundable, including annual plans. Online checkout is not open yet; we set up each account with you directly. See the payments guide.

PRICING · RESOURCE AUGMENTATION AND PLACEMENT

Placement referral and resource augmentation

Placement referral is 5% of total annual pay, payable by the employer when a referred candidate is hired. It is non-refundable.

Term	What it means
Placement fee	5% of the candidate's total annual pay, payable by the employer when the candidate is hired.
Total annual pay	Annual base salary plus guaranteed cash pay. Excludes equity and discretionary bonuses. (Counsel to confirm the definition.)
Refunds	Non-refundable.
Free replacement	If the placed candidate leaves due to attrition within 3 months of start, we provide one free replacement referral.
Selection	The replacement and the original referral are subject to the employer selecting the candidate.
Referred candidates not selected	The employer may not hire a referred candidate directly within 12 months of referral, unless it pays the prescribed charge.
Prescribed charge	[To be set in the agreement. Not yet defined.]

Worked example

A candidate with a total annual pay of $80,000 is hired. The placement fee is 5% × $80,000 = **$4,000**, payable by the employer and non-refundable. If the candidate leaves for attrition reasons within 3 months, we provide one free replacement referral, subject to the employer's selection.

Resource augmentation

Contract staff (developers, automation specialists, operations staff) are quoted per engagement. Scope, team size, duration, rates and replacement terms are agreed in writing before work starts.

> Before this is offered, counsel should review: the written agreement; the "prescribed charge"; the 12-month restriction on hiring referred candidates, because no-hire clauses between employers can raise antitrust risk and their enforceability varies by state; state employment-agency licensing and fee rules, since some states regulate placement fees; and any worker-classification issues for contract staff.

OUR KEY OFFERINGS

Focused. Practical. Impactful.

Four service lines for businesses that want to grow and modernize without enterprise overhead.

01 · Business Advisory & Transformation

Strategy. Structure. Growth.

Build a stronger business with the right strategy, structure and operating model.

- Business strategy and planning
- Operating model and process improvement
- Corporate structuring and governance
- Market entry and expansion support
- KPI frameworks and performance management

Outcome: clear direction, efficient operations and scalable growth.

02 · AI & Business Automation

Automate. Intelligent. Efficient.

Leverage AI and automation to save time, reduce cost and improve accuracy.

- AI readiness assessment
- Workflow and process automation
- AI assistants and chatbots
- Document and data automation
- RPA and intelligent integrations
- AI adoption roadmap

Outcome: smarter workflows, lower cost and higher productivity.

03 · Digital Operations & CRM

Connect. Optimize. Scale.

Implement and optimize the right digital tools to run your business seamlessly.

- CRM setup and optimization
- Sales pipeline and automation
- Dashboards and business reporting
- Microsoft 365 / Google Workspace workflows
- Tool integrations and data visibility
- Ongoing support and optimization

Outcome: better visibility, stronger customer relationships and recurring growth.

04 · People & Organization Solutions

People. Process. Performance.

Build a high-performing organization with the right people, processes and culture.

- HR policies and process design
- Organization structure and roles
- Recruitment and onboarding support
- Performance management systems
- HR technology and transformation
- Training and capability development

Outcome: engaged people, stronger culture and sustainable performance.

Most engagements combine two or three of these.

Next: Engagement model →

OUR ENGAGEMENT MODEL

Assess. Advise. Transform. Manage.

The same four steps whether you hire us or subscribe to our software.

01

Assess

Understand your business, challenges and opportunities.

02

Advise

Provide strategic recommendations and a clear roadmap.

03

Transform

Implement solutions with speed, quality and precision.

04

Manage

Optimize continuously and deliver ongoing value.

What the client can expect

- A discovery call before any proposal.
- A written scope, outcome and price before work starts.
- Visible progress reports and a named owner.
- Results reported in the client's own numbers, monthly.

SOLUTIONS BY BUSINESS TYPE

Built for the way you work

Whether you run a salon, a clinic, a practice, a shop or a one-person business, start with the solution that fits your day.

Salon, spa and barber owners

Fill more chairs and stop losing calls while you work.

Start with: VeriBook online booking, deposits and reminders, with Vera answering calls and texts.

Doctors, dentists and clinics

Calmer front-desk scheduling and reminders.

Start with: Appointment scheduling and reminders through VeriBook.

Vera gives no medical advice. Patient data is used only after a healthcare compliance review (HIPAA).

Lawyers and law firms

Consultation booking and client intake.

Start with: Consultation booking and intake forms.

Vera gives no legal advice. Confidentiality and ethics review before live use.

Shop owners and retailers

Customers, sales and reporting in one place.

Start with: CRM setup, sales pipeline and dashboards.

Small businesses

Take repetitive work off the team.

Start with: Business automation, advisory and VeriBook for bookings.

Freelancers and consultants

Look professional and book clients online.

Start with: VeriBook Standard plan for bookings, reminders and deposits.

Home-based businesses

Run bookings from your phone.

Start with: VeriBook Standard plan, with reminders and Vera answering messages when you are busy.

Why partner with VeriPro Tech

- **Executive-level expertise** with real business experience.
- **Practical solutions** tailored to your goals and budget.
- **AI and technology-driven transformation** with measurable results.
- **Agile, transparent and client-focused** approach.
- **Long-term partnership** for sustainable success.

Regulated professions: scheduling and intake only, until a compliance review is complete.

Next: FAQ →

FAQ

Questions we hear most

Can I buy online today?

Not yet. Online checkout is not open. Book a call or email info@veriprotech.com and we will set up early access with you directly.

What is VeriBook?

An appointment platform for small service businesses: online booking, deposits, reminders and an AI assistant, Vera, who answers missed calls and texts and books them.

Does the AI act without approval?

No. Vera confirms with the customer before booking or changing anything. You can read every conversation and take over at any time.

Do you resell other companies' software?

Our own products are sold by us. We can recommend and set up third-party tools. Unless we agree otherwise in writing, those are billed by their providers.

How is my data handled?

We use your information only to respond to you and deliver what you ask for. We do not sell personal data. See the Privacy Policy.

Can I cancel a plan?

Email info@veriprotech.com to cancel. Your access continues until the end of the period you have already paid for. All payments are non-refundable, including annual plans.

What if I need more than Standard?

Larger teams, higher usage and custom work are priced to your requirements. Email info@veriprotech.com for a written quote.

Do you work with doctors, lawyers or regulated professionals?

Yes, for scheduling, reminders and intake. We do not give medical or legal advice, and client or patient data is used only after a compliance review with you.

How does placement pricing work?

Placement referral is 5% of the candidate's total annual pay, payable by the employer when hired, and non-refundable. Replacement and referral rules are in the written agreement.

Do you work outside the US?

Yes. We are US-registered and work with clients globally.

BOOK A CALL

Tell us where work is slowing down

Book a free 30-minute discovery call. No pitch deck. We name the clearest next step, and say so if that step is not us.

Contact details

Email: info@veriprotech.com

LEGAL

Privacy Policy

Updated November 2026. VeriPro Technologies Inc. ("we") operates this website. Draft: counsel review required before publication.

What we collect

Information you send us by email or the contact form, such as your name, email address and message. We do not use advertising cookies on this site.

How we use it

To reply to you, provide the services you ask about, and keep records of our correspondence. We do not sell personal data.

Sharing and retention

We share information only with service providers who help us run our business, or where the law requires. We keep it only as long as needed for these purposes.

Your choices

You can ask us to access, correct or delete your information by emailing info@veriprotech.com. This policy may change, and the date above will show when.

LEGAL

Terms of Use

Draft: counsel review required before publication.

This website is for general information about VeriPro Technologies Inc. and its products and services. Product descriptions, availability and pricing may change and do not form an offer.

Plans marked early access are provided under the written terms agreed at sign-up. All payments are non-refundable, including annual plans.

Content on this site is owned by us or our licensors and may not be copied without permission. The site is provided as is, and to the extent the law allows we are not liable for losses from its use.

Services we provide are governed by the written agreement between us and you.

Questions: info@veriprotech.com

CONNECTION GUIDE 1 OF 5

Booking

Every "Book" button on the website uses one link. Set it once and all buttons update.

Step by step

1. Create a booking page with a scheduling tool. Options include Calendly and Cal.com. Compare cost and features before you choose.
2. Set the discovery call to 30 minutes, with your availability and a confirmation email.
3. Copy the public booking link.
4. Open the website file. Find `BOOKING_URL` near the bottom of the page script and paste the link between the quotation marks.
5. Test: click each "Book" button and confirm it opens the booking page in a new tab.

Behaviour when the link is empty

Buttons open an email to info@veriprotech.com with the subject line set for that button, such as "Discovery call request."

> Before you use a booking tool, confirm its data-handling terms, reminder emails and time zone settings for the US.

CONNECTION GUIDE 2 OF 5

Payments and refunds

Online checkout is not active. Do not add payment buttons until a processor is connected and tested.

Policy shown on the website

- All payments are non-refundable, including annual plans.
- Cancellation stops future billing. Access continues to the end of the paid period.
- Payment processing, SMS and voice usage beyond plan allowances may be charged separately. Taxes may apply.

Setting up payments

1. Choose a payment processor, such as Stripe or Square. Compare US fees, payout schedule, dispute handling and developer support.
2. Complete business verification and tax setup. Have a finance person confirm the account.
3. Use the processor's hosted checkout or payment links. Card details must never be stored on the website or in Vera.
4. Test with the processor's test mode: successful payment, declined card, cancellation and refund records.
5. Only then add "Pay" or "Subscribe" buttons, and update the pricing page wording.

> Counsel must confirm the non-refund wording, because some jurisdictions and consumer rules limit non-refundable terms. Decide now how disputed charges will be handled.

CONNECTION GUIDE 3 OF 5

Vera AI assistant

Vera handles conversations and asks the business systems for facts. She never states prices, times or policies that a system did not return.

Connecting Vera to a business

1. Load the business's services, staff, hours, prices and policies into the scheduling system. Vera reads only from that system.
2. Connect a messaging channel for text and web chat. Connect a phone number for voice if the plan includes it.
3. Turn on the AI disclosure message, which tells customers they are talking to an AI assistant.
4. Set the owner's escalation contact, so requests for a person reach staff.
5. Run a test booking end to end, then a cancellation and a handoff.

Rules that cannot be switched off

- Vera asks for explicit confirmation before creating, moving, cancelling or charging anything.
- Vera refuses medical, legal and refund decisions, and passes them to staff.
- STOP ends messages on that channel immediately.
- Each business's data is kept separate from every other business's.

Connection to external tools

Vera connects to a booking system, a payment link service and the staff inbox. Each connection is set up with the business's own account. Ask before connecting any new tool.

CONNECTION GUIDE 4 OF 5

Email, forms, CRM and analytics

Need	Recommended approach	Notes
Enquiry form	Today: opens the visitor's email app. Later: a hosted form service.	Hosted forms need consent text and spam protection.
Business email	info@veriprotech.com on your domain's mail service.	Set SPF, DKIM and DMARC so messages are delivered.
Customer records	VeriBill when released; until then, your current CRM.	Avoid two sources of truth for the same client.
Analytics	Privacy-friendly analytics, such as Plausible or Google Analytics 4.	Update the Privacy Policy if you add any tracking.
Marketing email	Consent-based list tool with an unsubscribe link.	US email rules require accurate sender details and opt-out.

Before adding any tracking

- Update the Privacy Policy and the cookie statement.
- Do not add advertising pixels without a decision and counsel review.

CONNECTION GUIDE 5 OF 5

Hosting, domain and launch checklist

Hosting

The site is one HTML file plus a logo. Any static host works, such as Netlify, Vercel, Cloudflare Pages or your own web server. Upload the review package folder as it is.

Domain

Point veriprotech.com to the host, enable HTTPS, and set redirects so www and non-www both work.

Launch checklist

- [ ] Booking link pasted and tested
- [ ] Standard plan features confirmed
- [ ] Prices confirmed for Standard and larger requirements
- [ ] Privacy Policy and Terms reviewed by counsel
- [ ] Refund wording approved by counsel
- [ ] Payment processor connected and tested (only if checkout is added)
- [ ] Contact form and info@veriprotech.com mailbox tested
- [ ] Every page checked on phone and desktop
- [ ] Links checked: every internal anchor and external link
- [ ] Business information accurate: name, US registration, contact details

SECURITY

Security

Protect customer data, keep the site online, and be able to prove what happened.

Website and transport

- Serve every page over HTTPS only. Redirect HTTP to HTTPS and enable HSTS once HTTPS is confirmed working.
- Set security headers: Content-Security-Policy, X-Content-Type-Options: nosniff, Referrer-Policy: strict-origin-when-cross-origin, and frame protection (frame-ancestors 'none').
- Keep the site static where possible. A static file has far fewer attack points than a database-backed site.
- Do not put secrets, API keys or internal URLs in the HTML. Anything in a public file is public.

Accounts and access

- Enable multi-factor authentication on the domain registrar, hosting, email, code repository, payment processor and scheduling tool.
- Use a password manager and unique passwords. Give each person the least access they need, and remove access when they leave.
- Keep one recorded owner for each account. Store recovery codes in a secure vault.

Data and vendors

- Record every vendor that receives personal data, with its purpose and location. Check each vendor's security and data-processing terms.
- Collect only what each form needs. Enquiry form data should be deleted or archived on a set schedule.
- Back up the website files and the contact records. Test a restore at least once before launch.

Monitoring and incidents

- Monitor uptime and certificate expiry. Subscribe to security advisories for the hosting platform and every script library.
- Write a short incident plan: who decides, who contacts customers, who contacts regulators, and how evidence is kept.
- US states each set their own breach-notification rules, and some other countries do too. Have counsel confirm the deadlines and content before launch.

Before launch

- Run an external vulnerability scan and fix high-risk findings. Repeat after major changes.
- Check that the page loads with scripts blocked except the ones you intend, and that no data is sent to unknown domains.

COPYRIGHT AND CONTENT

Copyright and content ownership

Know who owns every word, image, font and line of code on the site, and keep a record.

What we own and must protect

- Website text, layout, the Vera example conversation, product descriptions and the document you are reading.
- The VeriPro wordmark and the VP monogram. Keep a signed assignment from any designer who made them.

What we must license or credit

- **Fonts:** Inter is used under the SIL Open Font License. Keep the licence notice with any copy you host.
- **Icons and images:** use only images you own or have licensed for commercial use. Keep the licence receipt. Do not use search-engine images.
- **Open-source code:** list each library, its licence and version. Permissive licences (MIT, Apache 2.0) need the notice kept. Copyleft licences (GPL) need legal review before use.
- **Testimonials and case studies:** get written permission before publishing a client's name, logo or quote.

Protecting our content

- Add a copyright notice in the footer: © 2026 VeriPro Technologies Inc. All rights reserved.
- Register important works with the US Copyright Office if they matter commercially, such as the logo artwork and major guides.
- If users will post content on the site later, add a copyright complaint process and register a DMCA agent with the US Copyright Office.

Record of ownership

- Keep a single register: asset, creator, licence, date, and where it is used.

Ask counsel to confirm the logo assignment and any third-party licences.

Next: Brand and trademark → →

NAME, BRAND AND TRADEMARK CLEARANCE

Name, brand and trademark clearance

Confirm that VeriPro, VeriBook, VeriBill, VeriHR and Vera can be used and protected before wider marketing.

Clearance steps

1. **Search the USPTO database** (trademark search) for each name in the relevant classes. Check classes 9 (software), 35 (business services) and 42 (SaaS and technology services).
2. **Search the state and common-law records**, including business names, app stores, social handles and domain names, for conflicting uses.
3. **Check the domains and handles:** veriprotech.com, the .com variants of each product name, and matching social handles.
4. **Commission a formal clearance opinion** from a trademark attorney for any name you plan to launch under. Searches alone do not confirm that a name is free to use.
5. **File applications** for the names that matter most, at federal level, once clearance is complete. Filing early secures priority.

Names to clear

Name	Use	Risk note
VeriPro / VeriPro Technologies Inc.	Company and logo	Crowded "Veri-" prefix in tech. Search the full family.
VeriBook, VeriBill, VeriHR	Products	Each product needs its own clearance.
Vera	AI assistant	Common given name and existing marks in other fields.

Company and brand housekeeping

- Confirm the legal entity name, state of registration and the US federal EIN match the name on the website and contracts.
- Use the ™ symbol for unregistered marks and ® only after registration. Never use ® early.

COMPLIANCE

Compliance: privacy, messaging, accessibility and payments

Requirements that apply to this website and the services behind it. Confirm each one with counsel before launch.

Area	What applies	Action
Privacy (US)	State privacy laws such as California (CCPA/CPRA) and others apply by state and by thresholds.	Publish a privacy notice; honour access, deletion and opt-out requests.
Privacy (abroad)	GDPR (EU/UK) and similar laws (e.g. Canada, Australia, Brazil) may apply to visitors or clients abroad.	Identify a lawful basis, offer a rights contact, and consider a DPA with vendors.
Email marketing	CAN-SPAM: accurate sender, subject and a valid postal address, with working opt-out.	Add a physical postal address to marketing emails.
SMS and calls	TCPA and state rules require documented consent. Quiet hours and opt-out (STOP) apply.	Separate transactional and marketing consent. Obtain counsel review.
AI assistant	Disclose that the customer is talking to AI. Some states and countries require it for chat and voice.	Keep the disclosure on by default; log consent to recording where used.
Accessibility	ADA lawsuits target websites. WCAG 2.2 AA is the usual benchmark.	Test keyboard use, screen readers, contrast and zoom; publish an accessibility statement.
Payments	PCI DSS applies to any card handling. Keep card data with the processor.	Use hosted checkout; complete the processor's PCI questionnaire (SAQ A where eligible).
Cookies and tracking	Consent banners are needed for non-essential cookies in some regions, notably the EU and UK.	Use a consent tool if analytics or marketing pixels are added.
Business licensing	Some cities and states require a business licence or registration.	Check the state of operation and any industry licences.

Accessibility statement (publish)

VeriPro Technologies aims to meet WCAG 2.2 Level AA. Report accessibility problems to info@veriprotech.com. We aim to respond within five business days.

TAX

Tax: US federal, state and international

Software and services are taxed differently in each place. Set up registration before the first sale.

United States

- **Income tax:** register the entity type (corporation, LLC or other) with the IRS and each state of operation. Keep books in a recognised accounting system.
- **Sales tax on SaaS:** many states tax software-as-a-service differently, and some do not tax it at all. Rules depend on the buyer's location and the product's description. Check each state where customers are located.
- **Economic nexus:** a state can require registration once sales pass its threshold, even with no office there. Track revenue and transactions by state monthly.
- **Payroll and contractors:** issue Forms W-2 or 1099 as required. Confirm worker classification with a specialist.
- **Records:** keep tax records for at least the period required by the IRS and each state.

Outside the United States

- **VAT (EU, UK) and GST (Canada, Australia, others):** digital services sold to consumers abroad often require local registration once thresholds apply. Rules differ by country.
- **Place of supply:** the buyer's location usually decides which tax applies. Collect and keep evidence of the customer's location.
- **Withholding tax:** payments from some countries can be subject to withholding. Check any tax treaty with the United States.
- **Foreign contractors:** collect Form W-8BEN (or W-8BEN-E) from non-US contractors before payment.

Practical steps

- Use a tax-calculation service that updates rates and rules automatically, and show tax as a separate line on invoices.
- Have a tax adviser review the setup before the first paying customer, and again each year.

LEGAL DISCLAIMERS AND GUIDELINES

Legal disclaimers and website guidelines

Standard wording to place on the website, in emails and in the product. Counsel must approve the final text.

General website disclaimer

Information on this website is for general guidance only. It does not constitute legal, tax, financial or professional advice. Product descriptions, availability and pricing may change without notice.

AI assistant disclaimer

Vera is an AI assistant. Responses are generated automatically and may contain errors. Vera does not provide medical, legal, financial or tax advice. Bookings, changes and payments are confirmed with you before they are made. For a decision, speak to a person.

Pricing and early-access disclaimer

Prices are in US dollars and shown before any applicable taxes. Plans marked early access are subject to the written terms agreed at sign-up. Usage above plan allowances may be charged separately.

Case studies, results and testimonials

Results depend on the client, the starting point and the work done. Figures shown are examples unless marked as verified. Testimonials are used with permission.

Third-party links and tools

Links to third-party sites and tools are provided for convenience. We do not control their content or privacy practices. Check each provider's terms before use.

Guidelines for everything we publish

- Do not claim to be an accredited, certified or regulated provider unless it is true and documented.
- Do not make guarantees of revenue, savings or outcomes in marketing.
- Mark sponsored or affiliate content clearly.
- Describe early-access and planned products using the status labels in this guide.
- Keep a dated copy of every version of the website text and disclaimers.

COLOUR AND THEME GUIDELINES

Colour and theme guidelines

The VeriPro palette, how much of each colour to use, and the accessible pairings.

Colour	Hex	Use	Swatch
Deep navy	#14304F	Headings, dark sections, footer	
Action blue	#1D4ED8	Buttons, links, active states	
Soft off-white	#F8FAFC	Cards and light panels	
Dark slate	#1F2937	Main body text	
Cool grey	#475569	Supporting text on white	
Light blue tint	#EAF0FF	Highlighted panels, text on navy	

Balance of colour

About **60%** light backgrounds, **30%** navy and text, **10%** action blue. Blue marks what to click; use it sparingly.

Accessible pairings (WCAG contrast, measured)

Pairing	Ratio	Result
Navy text on white	13.4 : 1	Passes AA and AAA
Dark slate body on white	14.7 : 1	Passes AA and AAA
Cool grey on white or off-white	7.6 : 1 / 7.2 : 1	Passes AA
White on action blue	6.7 : 1	Passes AA
Light tint on navy	11.8 : 1	Passes AA and AAA
Cool grey on navy	**1.8 : 1**	**Fails. Do not use.**

Rules

- Use the light tint, not cool grey, for supporting text on navy.
- Never place text on a colour not listed here without checking its contrast.
- Status colours (green for confirmed, amber for warnings) are functional only. Do not use them as brand colours.
- Do not use the teal, purple or green from older brochure artwork on the website.
- Business card colours differ from this palette (card navy #2F3D56, card blue #4171B8). Confirm which set is official before print.

TYPOGRAPHY, LOGO AND COMPONENTS

Typography, logo and components

Type choices, logo use and the component rules that keep the site consistent.

Typography

- **Typeface:** Inter (open-source, SIL OFL). Fallbacks: system-ui, Segoe UI, Roboto, Arial.
- **Weights:** 400 for body, 600 for labels, 700 to 800 for headings.
- **Sizes:** body 16px on the web (10.5pt in print); headings scale with the screen. Keep line height at 1.5 or more for body text.
- **Eyebrow labels:** uppercase, letter-spaced, blue on white and tint on navy.

Logo

- Use the supplied logo files only. Use the light logo on white backgrounds and the dark logo on navy. Do not redraw, recolour, stretch or add effects. The logo reads TECHNOLOGIES; the full legal name appears in the footer and legal text.
- Keep clear space around the logo equal to the height of the "v".
- On navy, use the dark logo (white and blue), never the light logo.
- Minimum width on screen: 160px. Print: 40mm.

Components

- **Primary button:** blue background, white text. **Secondary:** outlined navy on white, or outlined white on navy.
- **Cards:** off-white, 1px light line, 12px radius. On navy, use a translucent tint with a light border.
- **Focus:** a visible 3px blue outline on every interactive element.
- **Status tags:** EARLY ACCESS, PLANNED, IN VERIBOOK. Use exactly these labels.

Section rhythm

Sections alternate white and navy. Keep this pattern when adding pages, so the site reads as one design.

DOCUMENT CONTROL

Open items before publication

Item	Owner	Status
Standard plan features (usage allowance, support)	Product	Open
Standard price $10 / month, $100 / year	Leadership	Open: confirm
